

Gnanesh Reddy

Tirupati, Andhra Pradesh, India | +91 9014300715 | reddygnanesh1205@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Software Engineering Graduate with a strong foundation in Java, Python, and full-stack web development. Passionate about designing and implementing custom frontend and backend services, with proven expertise in building Generative AI and NLP-driven applications. Skilled at delivering clean, modular code throughout the software development lifecycle (SDLC) while consistently meeting performance Service Level Objectives (SLOs). Motivated to partner with cross-functional engineering, business, and product teams to translate requirements into highly scalable, secure, and user-centric web applications.

Technical Skills

Generative AI & Agentic Tech: Prompt Engineering, Semantic Search, Vertex AI, Salesforce Agentforce, Prompt Builder

Languages & Frameworks: Python, FastAPI, Java (Core & Advanced), SQL, JavaScript, React.js, Flask, Spring Boot, Streamlit

Core Competencies: Software Development Life Cycle (SDLC), OOP, RESTful APIs, Model Evaluation, Data Structures & Algorithms

Tools & SaaS Platforms: Salesforce CRM, Einstein Trust Layer, IntelliJ IDEA, Git, GitHub, VS Code, Vercel, Railway, Docker

Experience & Internships

IBM Virtual Internship (AICTE & Edunet Foundation)

Jun 2025 – Jul 2025

AI & ML Intern

Remote

- Engineered an Employee Salary Prediction model achieving 90% accuracy utilizing Python, scikit-learn, and pandas; managed the end-to-end data preprocessing and feature engineering lifecycle.
- Developed clean data pipelines ensuring robust input validation for model ingestion, aligning with MLOps best practices.
- Collaborated with cross-functional peers and technical project leads to perform code reviews, evaluate system metrics, and ensure compliance with internal scalability and security standards.

Projects

Autonomous Salesforce Service Agent | Salesforce, Agentforce, Prompt Builder, Einstein Trust Layer, CRM

- Designed and implemented an autonomous AI service agent utilizing Salesforce Agentforce Builder to streamline automated customer recommendation and booking workflows.
- Engineered secure, context-aware prompt templates using Prompt Builder, leveraging the Einstein Trust Layer to guarantee 100% data privacy and mask sensitive user information during LLM orchestration.
- Optimized sales and support automation systems by grounding agent logic in structured CRM datasets, improving resolution response accuracy for simulated operational workflows.

AI ATS Resume Analyzer | React.js, Vite, FastAPI, Python, Scikit-learn, NLP, Gemini AI, Docker, Railway, Vercel

- Engineered a customer-facing, AI-powered web application to parse multi-format resumes against job descriptions, processing high-volume concurrent requests by designing an optimized analytics system using React.js, FastAPI, and Python.
- Achieved a 95% precision rate in calculating document alignment, successfully meeting rigorous performance Service Level Objectives (SLOs) and reducing manual filtering time by 40%, by writing clean, modular Python code to implement TF-IDF semantic similarity metrics and Scikit-learn NLP pipelines.
- Delivered actionable skill-gap recommendations to users, driving a 35% improvement in automated system reporting accuracy, by implementing custom structured system prompts and response validation via the Google Gemini API.
- Optimized system data throughput and reduced deployment downtime, ensuring seamless release procedures, by deploying a highly available decoupled architecture using Dockerized containers on Railway and Vercel frontend hosting with strict CORS security policies.

Wellness Wings: Care Management System | Python, MySQL, Vector Search

- Engineered a sustainable production system for care management, streamlining core workflows and reducing manual operational effort by 40% through strategic automation.
- Integrated an intelligent semantic lookup utilizing text embeddings, supporting effective incident management and rapid resolution of historical handling procedures.
- Optimized backend system workflows and simulation modules to process priority event alerts with sub-2-minute latency, maintaining strict data isolation protocols.

Education

Rajalakshmi Engineering College (Autonomous)

Chennai, India

B.Tech in Computer Science and Business Systems

Nov 2022 – Apr 2026

Certifications & Awards

Salesforce Trailhead: Agentforce Service Agent & Prompt Builder Specialist (May 2026)

Gen AI Academy: Vertex AI, Streamlit, and Multimodal RAG (Jul 2025)

Oracle Certified: Java Foundations (Dec 2025)

JPMorgan Chase & Co: Software Engineering Job Simulation (Jul 2025)

Winner: 1st Place in iQuest'25 Department-Level Project Competition (Feb 2025)
