

Gnanesh Reddy

Tirupati, Andhra Pradesh, India | +91 9014300715 | reddygnanesh1205@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Software Engineering Graduate with a strong foundation in Java, Python, and full-stack web development. Passionate about designing, implementing, and maintaining custom enterprise applications and software systems throughout the software development lifecycle (SDLC). Adept at translating complex customer requirements into scalable, clean, and modular code while consistently meeting rigorous performance Service Level Objectives (SLOs). Motivated to partner with cross-functional engineering teams within Agile environments to deliver robust, high-quality technology solutions.

Technical Skills

Languages & Frameworks: Java (Core & Advanced), Python, Spring Boot, FastAPI, SQL, JavaScript, React.js, Flask, Streamlit

Core Competencies: Agile Development (Scrum), Object-Oriented Programming (OOP), Troubleshooting & Debugging, RESTful APIs

Generative AI & Agentic Tech: Prompt Engineering, Semantic Search, Vertex AI, Salesforce Agentforce, Prompt Builder

Tools & Infrastructure: Git, GitHub, Version Control, Docker, Salesforce CRM, Einstein Trust Layer, IntelliJ IDEA, VS Code, Vercel, Railway

Experience & Internships

IBM Virtual Internship (AICTE & Edunet Foundation)

Jun 2025 – Jul 2025

AI & ML Intern

Remote

- Engineered an Smart Finance Dashboard model achieving 90% accuracy utilizing Python, scikit-learn, and pandas managed the end-to-end data preprocessing, software systems troubleshooting, and feature engineering lifecycle.
- Developed and maintained clean data pipelines ensuring robust input validation for model ingestion, aligning with software development methodologies, Unit Testing protocols, and MLOps frameworks.
- Collaborated with cross-functional teams in an Agile Scrum environment to perform rigorous software code reviews, evaluate system metrics, and ensure adherence to clean coding standards.

Projects

Autonomous Salesforce Service Agent | Salesforce, Agentforce, Prompt Builder, Einstein Trust Layer, CRM

- Designed and deployed an autonomous AI service application using Salesforce Agentforce Builder, translating specific customer requirements into automated workflows that cut onboarding friction by 30%.
- Enforced 100% data privacy and masked sensitive information during execution by engineering secure, context-aware prompt architectures within the Einstein Trust Layer framework.
- Boosted software system resolution accuracy by 25% across simulated operational workflows by grounding application architecture in structured CRM datasets and troubleshooting distributed API edge cases.

AI ATS Resume Analyzer | React.js, Vite, FastAPI, Python, Scikit-learn, NLP, Gemini AI, Docker, Version Control

- Scaled a customer-facing web application using React.js and FastAPI to maintain high-throughput software systems processing for over 500 concurrent requests, aligning with modern software design paradigms.
- Achieved a 95% precision rate in document alignment and reduced manual filtering time by 40% via clean, modular Python code implementing TF-IDF semantic similarity metrics and thorough Integration Testing.
- Utilized custom system architecture and automated validation via the Google Gemini API to drive a 35% improvement in automated system reporting accuracy, documenting all changes via Git Version Control.

Wellness Wings: Care Management System | Python, MySQL

- Streamlined core care management software applications through strategic automation and reducing manual operational overhead by 40% for end-user requirements.
- Integrated an intelligent semantic lookup engine with text embeddings, enabling rapid 15-minute resolutions for historical incident handling procedures and core software system workflows.
- Optimized and debugged backend system simulation modules in Python to hit sub-2-minute latency targets for priority event alerts and maintaining strict data isolation.

Education

Rajalakshmi Engineering College (Autonomous)

Chennai, India

B.Tech in Computer Science and Business Systems

Nov 2022 – Apr 2026

Certifications & Awards

Oracle Certified: Java Foundations (Dec 2025)

Salesforce Trailhead: Agentforce Service Agent & Prompt Builder Specialist (May 2026)

Gen AI Academy: Vertex AI, Streamlit, and Multimodal RAG (Jul 2025)

JPMorgan Chase & Co: Software Engineering Job Simulation (Jul 2025)

Winner: 1st Place in iQuest'25 Department-Level Project Competition (Feb 2025)
